Lyubomir Georgiev Georgiev

Sofia, Bulgaria | +359 882 511122 | lyubomirgeorgiev2712@gmail.com

Tech Stack

- **Languages:** C#, JavaScript, TypeScript, SQL
- **Skills:** OOP & SOLID, AI prompting, Data structures & algorithms, Design patterns, Fluent English
- **Frameworks:** ASP.NET Core, React, Entity Framework, XUnit
- **Libraries:** SignalR, MediatR, Moq, Quartz, MailKit, Framer Motion, Tailwind
- **Others:** Git, Kafka, RabbitMQ, ELK Stack, JWT, Docker, Azure, AWS, Reddis, Jira, Jenkins

Experience

.Net Developer | EGT Digital | 04/2026 - 10/2026

- **Bonuses & Campaigns team:** Played part in the core team of Player Engagement department. Delivered production code, unit tests, and bug fixes for bonus services, including the Boost bet builder. Monitored and investigated issues using ELK, OpenTelemetry, Grafana, and Kafbat UI. Collaborated with QAs and Product owners on bonus-related features. Developed hands-on experience with **distributed systems** and **monolith microservices**, **asynchronous messaging** with **Kafka**, **caching** with **Redis**, and production support, where reliability and transaction performance are essential.

- **Tournaments team:** Helped modernize and maintain a legacy tournaments service that processes bets, calculates leaderboard points, and distributes rewards. Contributed with refactorings, production fixes, player-name masking, and unit tests with **xUnit** for quiz-based bonus points.

- **Bonus Quotas:** Contributed to the development, testing and deployment of a Sports API facade, delivered to production within a three-week sprint. Build multiple endpoints and used **Kubernetes** to troubleshoot Sports API pods.

Full-Stack Developer | Veliko Tarnovo University | 02/2024 - 01/2025

- Architected the core infrastructure for the university-wide document workflow platform.
- Implemented core business logic for a university student-candidate management platform.
- Handled end-to-end Agile tasks, creating tickets, and executing independently managed sprints.
- Designed and built the personal website for the Computer Technology Department of the university.

Projects

EasyBook | AI Powered Hotel Booking Web Application | https://github.com/lyubomir2712/Hotel_Booking

- **User Experience**: bookings cart, **responsive design**, admin panel authentication and authrorization.
- **Real-Time Updates**: SignalR with **WebSocket connections** for instant admin notifications.
- **Event-Driven System**: integrated **Kafka** for logging and handling client operations.
- **Email Notifications**: automated email sender using **MailKit** for user registrations and cart checkouts.
- **Testing & Quality**: comprehensive **unit and integration tests** using **xUnit** and **Moq**.
- **Containerization**: **Dockerized** SQL database, Ollama client, Redis and Kafka services.
- **In-Memory Database**: in-memory layer backed by **Redis** used to store **Kafka logging events**.
- **AI Chat Bot (Ollama + Qwen)**: integrated **local AI assistant** used for chat interactions.

Education | Bachelor of software engineering | Veliko Tarnovo University | 2022 - 2026
